Source: Earthworm Castings

Directions

Vegetables and Annual Flowers

Line bottom and sides of plant holes and seed furrows with 1"-2" of earthworm castings. Set seeds or plants in place and cover with soil. Side dress during growing seasons at a rate of 1/2 cup per plant or 1 cup per linear foot of row once every 2 months.

Perennials

Work 1/2 cup Earthworm castings into the soil above their root zone taking care not to damage shallow roots. Apply in spring, early summer and early fall.

Potted Plants and Seeds/Seed Flats - New

Potting mix-use 1 part Earthworm castings to 3 parts soil.

Potted Plants, Window Boxes or Hanging Baskets - Established -

Add 1-2 inches of Earthworm castings to top of soil. Mix in taking care not to damage shallow roots - water - repeat every 2-3 months.

Roses, Trees, Shrubs and Berries - New or freshly transplanted

Mix 1 part Earthworm castings to 3 parts soil. Surround newly dug hole with mixture. Spread roots over a mound of the mix in the hole and cover.

Roses - Established

Mix 4 cups of earthworm castings into soil 2-3 inches below the surface for each plant.

Lawns - New

Apply 10 lbs. per 100 sq. ft. Work lightly into the topsoil. Mix in grass seed and water well.

Lawns - Established

Distribute as top dress 10 lbs. per 100 sq. ft.

Casting Tea

Soak 1 part castings in 3 parts water for 12-24 hours. Stir well and water as usual. Casting tea is excellent for fruiting, flowering or difficult to access potted plants.

Compost Piles

Spread a thin layer of earthworm castings between each new layer of material to be composted.
